EDUCATION

The University of Tennessee, Knoxville

Bachelor of Science in Geographic Information Science and Technology

Graduation: May 2027

Cumulative GPA: 3.74

GIST EXPERIENCE

University of Tennessee Knoxville

GIS as a Community Tool Independent Study

Knoxville, Tennessee

August 2026 – Present

- Attempting to build a GIS model that can examine the logic behind the geographic distribution of traffic “checkpoint” immigration enforcement on the Latino community in Knox County, TN.
- Plans to write a research paper on the process of creating a community GIS tool, the ethical and informational considerations behind it, and the potential benefits that it can produce.

Glacier Mapping Independent Research

January 2026 – Present

- Manually mapped over 450 glacier boundaries in the Wind River Range, Wyoming.
- Reconstructed glacier change between 1966-2020 using geomorphic classification techniques.
- Presented research at UTK’s Exhibition of Undergraduate Research and Creative Achievement (EURēCA) 2026.
- Plans to present research at the Geological Society of America’s Connects 2026 conference in Denver, Colorado.

Venice Coastal Flood Vulnerability Project

October 2025 – December 2025

- Calculate and map coastal vulnerability based on multiple sea-level rise scenarios using elevation and distance from the coast.
- Work with Python libraries including geopandas, rasterio, numpy, matplotlib, and shapely.

SKILLS & CERTIFICATIONS

- ArcGIS
- Google Earth Pro
- 3D Printing
- Laser Cutting
- Italian (native)
- Spanish (Intermediate)

RELEVANT COURSE WORK

Fall 2025 *Quantitative Methods in Geography*

- R and R Studio software and statistical reasoning within geographical concepts.

Fall 2025 *Contemporary Urban Spaces*

- Geographical concepts related to socio-cultural changes in contemporary urban spaces.
